Grayling played headsup ball for eight innings and led the Cheboygan Independents until the final inning of the game when a lapse gave the game to the visitors on Sunday, July 15.

Going into the final inning, Grayling led 12 to 10. Up to the eighth inning, they were ahead 12 to 7. In the top half of the ninth, Cheboygan pushed over four runs and held Grayling scoreless in the bottom half to take the victory.

Bernie Sadjak and Bob Gildner worked on the mound for Grayling with Tom Anthony catching. Gildner walked two, gave up 12 hits and struck out four. Sadjak gave up four hits and struck out one. Cheboygan used Percy, Madrak and King as hurlers while B. Beauchamp took care of the catching duties. The combined visiting pitching staff struck out nine and walked seven while giving up 14 hits. The visitors leading hitter was Stillwell with two home runs and a double in six times at bat. Grayling's leading hitters were Sadjak with two doubles and a walk, Clyde Anthony with two singles and a walk, Bob Gildner with a home run, a single and a walk, Elery Horning with two singles and a walk, Bill Worden with two singles and a walk, and a single and three walks.

As the top half of the ninth opened, Cheboygan's Donovan struck out. V. Beauchamp walked, Worden singled, sending Beauchamp to third. King doubled scoring both runners and tying the ball game. Stillwell then hit his second home run of the ball game to send Cheboygan into the lead. Van Paris then grounded out Anthony to Worden.

In the bottom half of the ninth, Grayling had runners on first and second with one out but Worden grounded into a double play to stall the rally. Although Grayling had another loss marked up against their record they came very close to winning and played the best ball of the season.

Next Sunday, July 22, Grayling travels to Onaway for a Northern Michigan Independent Baseball League game and on the following Sunday, July 29, Lewiston meets Grayling at the City Park Field here.

## Guide To Fishing

By JACK SCHWEIGERT

WSGW Roving Reporter.

A fisherman friend of mine gave me a clipping from some newspaper de-bunking theories on when the fish bite. It was interesting to read, how some try to be Lords over Nature. Ever since this World began the Sun, Moon and Stars had some significance, yet some keep trying to de-bunk all Nature's doings. But part of this clipping brought out the facts that they also are just giving theories. One part read, "Fishermen who believe in these calendars or other similar printed material fish harder during the time when fish are supposed to bite, and thus they catch more fish."

In the last part of the clipping it said: "Best time to fish is when you have the urge." This debunks their own theory, because when do we get the urge? When it is too hot? When it is too cold? When it is lightning and thundering? Or when the water is too high or muddy? Come now, no matter how smart you are, or if you have a doctor handy on your name, let's not try to de-bunk the works of our Creator.

Some in this World have even gone as far as trying to de-bunk the way our Creator wants us to live. If we ever get to the time when we have no Sun or Moon I doubt whether the fish will bite, or that we will be in the mood or have the urge to fish at that time.

Yes, sir the Sun has come to the spot in the sky where the Grass Hoppers are starting to come out, and the fish are starting to feed on them. And the works of Nature have turned off the rain for a few days. This should let the streams come down to normal, after which the fish should bite better. Understand this is just my theory. If you want to believe some Doctor sprinkled a mixture of a few drops of this and that on this earth to make things change, that's up to you.

## County Buys \$400 In Tuberculosis Seals

A final total of \$391.75 worth of tuberculosis Christmas Seals was purchased by Crawford County citizens last year, according to the annual report of the Michigan Tuberculosis Association.

Packed with tuberculosis prevention information, the account warns that such programs as mass chest X-raying cannot whip tuberculosis unless "people know and observe good health practices."

Showing better ways to attack and defeat the disease, tuberculosis Christmas Seals are pictured on the job from the school rooms to the state legislative chambers.

Finding those infected, promoting tuberculosis hospital beds, helping the sick back to normal lives and year-round research are counted among programs Grayling citizens support through tuberculosis Christmas Seals.

This last week end in Frederic

was sure a busy one, weather good and traffic heavy. Some going home from their vacations and plenty just starting theirs. Too busy before to fish but now every one seems to be fishing and with very good luck, both in numbers and size, many extra large ones caught in the AuSable. At the Water-Shed Club nearly all members present and all report the best catch in years.

We are sure glad to see the Vollmers in town again, after spending some time in Saginaw. Bill says there's no place like home—Frederic. They are here to stay again. Welcome home, folks.

## Grass Roots Opinion

Anaheim, Calif., Bulletin: "Our nation is one of the few in the world in which free thought, criticism and truths can still be presented to the public. We take it for granted that this freedom will continue. But the present Presidential regime realizes the value of the press and its ability to mould and measure public opinion and reaction. Every day some new measures are introduced that would place newspapers under governmental censorship. So far these measures have been defeated or are amended to become worthless. A free press means a free people. We must remain alert to keep it so."

Philadelphia, Pa., Trades Union News: "Karl Marx, the fellow who wrote the creed of Communism, had something to say about taxation. He said that capitalism, which means our system of free initiative enterprise and progress, will eventually be destroyed by taxes, taxes and still more taxes." He even predicted that democratic, capitalist countries would, if left to their own devices finally tax their economic systems to death and thus bring in Communism. Well, taxation can do just that, if carried too far. The people who are continually fighting for more tax money to spend, even though their proposals may be excellent and even though some of the additional tax money might be used to benefit the people generally, should take the Marxian precept to heart. Taxes can kill our economy."

Madison, Georgia, News: "There seems to be some in Washington that are afraid the McArthur-Truman-Acheson controversy will reveal our plans to the Russians. . . . The thing that we think they are most worried about is that the people are about to find out how near Communistic our government has become."

Next time you back your Buick out of the garage, cock a critical ear at the sound of your exhaust.

Does it still have that tuneful, factory-new note? If not, that may mean your muffler has taken a beating and ought to be replaced—before it cuts down power, raises gas consumption, or leaks exhaust fumes.

Why not drop into our shop and let us bend our Buick-trained ears over it, and give it a close look for leaks? We're glad to do this with no charge—and if we can

give your muffler a clean bill of health, you'll find it mighty reassuring!

obtain contracts. The 1951 legislature vetoed a bill providing funds for this office.

Things continue to look up for a possible bridge at Mackinac Straits. Engineers say the stone formation at the Straits is such that it could hold the terrific stress of such a bridge—but that more test borings should be made. Previous reports said such construction was not feasible.

Wayne County is the fourth largest county in the United States, topped by Cook (Chicago), Los Angeles County and Kings County, New York.

Forty-five states now have anti-pollution laws, many of them modeled after Michigan's 1949 statute. Soon the old bromide voiced by hide-bound industrialists, "What do you want—jobs or fish?" will die a natural death—not the death dealt out indiscriminately by factories dumping waste in the waters.

The 1952 state election is sure to be a lively one. The C. I. O. and A. F. L. are seeing to it by whipping up interest in the gasoline tax referendum for which the C. I. O. is circulating petitions while the A. F. L. is preparing a constitutional amendment on apportionment.

Every year apportionment—which is a complex plan to give community representation on a new population basis—hits the table, is bandied about violently for several weeks and then allowed to die of malnutrition in a well covered pigeon hole.

With the prediction of a fine apple crop again this year, orchard operators are wondering if they'll face last year's problems. In 1950 growers couldn't afford to have the fruit picked—until a government subsidy overnight raised the price. In some circles this is known as a false economy.

Michigan residents this year contributed \$903,380 to help polio victims. Last year they gave only \$891,453.

Construction contracts in Michigan in May totaled \$63,450,000, or nine per cent more than April—but 30 per cent below May a year ago. Total for the first five months of 1951 was \$313,790,000, a nine per cent drop over 1950.

The trouble with great minds is they sometimes grate.

If more people would think more about where they are going instead of where they have been, this world would be better off.

The only spots the wife ever takes out of my clothes are ten spots.

When son gets near dad's size it certainly complicates the clothing situation.

A lawyer is a man who will work as hard as he can to see that you get what's coming to him.

A person wrapped up in himself makes a small package.

Many a woman has married her idol, and he has been idle ever since.

The straight and narrow path would be much wider if more people traveled it.

☒ **Plenty of power** for your job. Power has been increased up to 20% in eight great engines—94 to 154 hp. You get top economy, too—thanks to high compression ratio, 4-ring pistons with chrome-plated top ring, and many other extra values.

☒ **Maximum safety**—You get the finest truck brakes in the industry! On many models you get new, molded, tapered, Cyclebond brake lining for smoother, quieter, safer braking. And you'll ride in a welded all-steel cab with an extra-big windshield.

☒ **Easy handling**—You can turn, park, back up and maneuver with the greatest of ease . . . because of cross-steering, short wheelbase and wide front tread. Other aids to easy handling are the comfortable new steering wheel position and extra cab visibility.

☒ **Bigger payloads**—Balanced weight distribution enables you to haul bigger payloads on a Dodge "Job-Rated" truck without danger of overloading. Because the engine has been moved forward and front axle back, the right proportion of the load is carried on each axle.

☒ **Extra comfort**—Famous "Pilot-House" cab gives you safe, all-around vision with extra-big windshield and rear quarter windows. Roomy, "chair-height" seat is widest of any popular truck. New "Oriflow" Shock Absorbers on 1/2-, 3/4-, and 1-ton models give smoother ride.

☒ **gyrol Fluid Drive**—Only Dodge offers gyrol Fluid Drive. Available on 1/2-, 3/4-, and 1-ton models. You start with amazing smoothness. Gearshifting is minimized. Wear is reduced on vital parts. And Fluid Drive protects your load by minimizing damaging jolts.

Do you know what's between here and here?

Let's follow your physician's prescription into your pharmacist's compounding room...

The pharmacist's first act is to carefully interpret the prescription — check its signs and symbols to make sure of their precise meanings. Your safety is his legal responsibility.

That done, he assembles the necessary components for your prescription from the thousands of drugs he has in his stock. He knows them all intimately — their dosage, usage and properties.

Then he skillfully uses his specialized equipment to weigh, mix, or combine the ingredients of your prescription in strict accordance with your physician's specifications.

He checks and rechecks every ingredient he uses, and every step in his compounding technique. Instructions are confirmed, and directions stated on the label in such a way that no misunderstanding will occur. Finally, he registers your prescription by number and files it away for future reference.

He prepares simple mixtures as meticulously as he does the highly complex ones. In filling every prescription, he applies the technical skill and professional knowledge that have been acquired through many years of scientific training. As a member of one of the professions that help you guard your health, he is ever mindful of his responsibility. — Reprinted from a copyrighted advertisement published by Parke, Davis & Company, Detroit 32, Michigan.

## Frederic Man Now Teaching At Cheboygan

John C. Post, son of Mr. and Mrs. Charles Post of Frederic, is the new agricultural teacher employed by the Cheboygan High School. This summer he is calling on prospective farmer course students in interest of the new vocational agricultural department set up by the Cheboygan Board of Education.

Post, who is hired on a 12-month basis, began work there with the veterans' agriculture class but Superintendent Harold Wetherell announced that in the fall Post will have charge of the high school farm subjects.

A former Northern Michigan farm boy himself with an outstanding college record, he is considered splendidly qualified to head the new three year vocational agriculture department.

With start of the new department, a Future Farmers of America program will be started in the high school and an organization of young adult farmers will be formed.

Post is a war veteran who served as aerial gunner in World War 2. He was at Kwajalein, Hawaii, Guam and Japan.

As a boy he lived on a farm at West Branch, until his parents moved to Frederic. He was president of the Frederic High School senior class.

Enrolling at Michigan State College he was chosen a member of Alpha Zeta Fraternity, an honorary agriculture society composed of outstanding agriculture students selected from those who have stood in the upper two fifths of their class. He graduated last month with degree of bachelor in agriculture and with a major in vocational agriculture and a minor in farm shop.

He has considerable practical experience in shop work, gained by working in various mechanical industries.

Post is married and he and his wife make their home on South Main Street, Cheboygan.

The new U. S. Senate committee to investigate the grey market in steel, headed by Senator Blair Moody, has been hitting the headlines all over the country regularly.

No one denies this is a job long needed. The present program of the committee is to uncover "possible criminal" action by unnamed steel mill executives.

Moody says: "One practice is for mill operators and scrap dealers to conspire to improperly 'up-grade' scrap iron. There is evidence that loads of scrap which included cement blocks have been purchased by mills and paid for as top material ready to go into the furnace. By this means certain mills are alleged to have gotten excessively large scrap supplies at the expense of other operators."

Second practice is "tie-in" sales by which mills agree that if dealers supply them with scrap they will in turn sell steel back to the scrap dealers. This steel, it is reported, goes back on the black market — where it is purchased by the small business man."

The committee has been in Detroit and other Michigan industrial centers, although most of the irregularities are reported from Pittsburgh.

Locally, Auditor General John B. Martin Jr. has criticized Senator Moody for opposing reduction of Federal expenditures for press agent costs. The Federal government spends as much on publicity as Michigan spends to maintain its highways, he says. Martin is a candidate for the Republican nomination in 1952 for the U. S. Senate seat held by Democrat Blair Moody.

The Michigan system of checks and balances has too many checks and too little balance, says Leroy C. Ferguson, professor of political science at Michigan State College. Says Ferguson, "The Governor has power to watch the legislature and the legislature has power to watch the Governor — consequently, both bodies have more watching power than acting power." He was speaking at the annual forum on state and local government held at the college.

Also under fire at the panel meeting was the state administrative board, made up of the Governor and top department heads. A sort of Governors cabinet, the board has been assailed as too small, ineffective and hindering

in state administrative efforts. Professor Walter S. Ryder, Central Michigan College of Education, says: It is an "institution of the horse and buggy days."

State officials use the forum to air gripes against the current set-up. And always there are many. But in past years the forum generally has been considered long on theory and short on practical experience — or results.

Governor Williams envisages a number of state clinics to treat alcoholism, a system such as New York has had for several years. In casting about for five men to appoint to the new board, which was ordered by the 1951 legislature, Williams said a new agency like this should be independent of other commissions so "it will not be hampered by old ideas."

A new experiment at M. S. C. shows that a college-industry training program can cut the training period for new plant foremen from six months to one month. Officials say the four-week course substitutes for the "trial-and-error" method usually used in promoting machinists to foremen.

Michigan State College now is also giving a two-week summer course in truck driving. Expected for the course are 650 enrollees, which will be repeated several times each year.

The Michigan State Police have started 26 more recruits through training school, planning to graduate them by September 7. The shortage of state policemen since the end of World War II is easing up. This is the 10th post-war class and the third in which married men have been accepted.

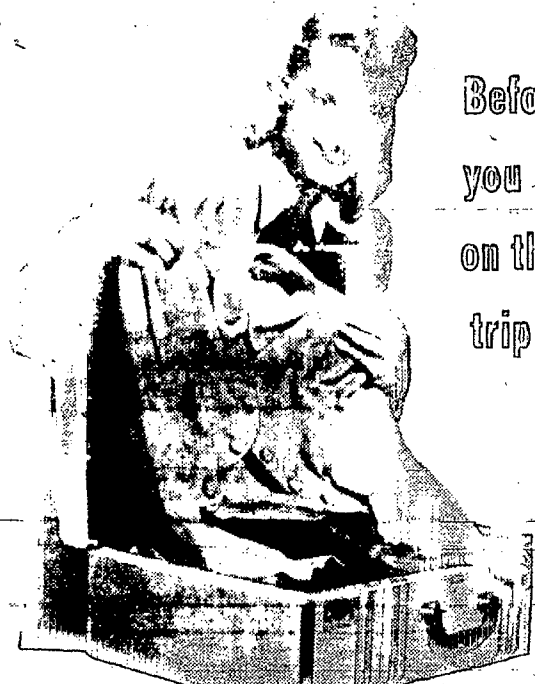

The Migrant problem arises again in Michigan. The influx of workers for the fruit and berry orchards this year is greater than ever and the usual difficulties present themselves. Housing is a principal issue, although many farmers provide make-shift quarters on their farms.

Law enforcement is another major problem. In the Traverse City area the State Liquor Control Commission has banned the sale of liquor in pints and of wine of more than 16 percent alcoholic content until August 18.

The Benton Harbor area may consider similar restrictions during the heavy peach and apple picking season.

## APPENDICITIS OPERATION MAY BE REDUCED

In 100 appendix operations it was found that only 38% of the patients had been suffering from appendicitis, the rest having been victims of other disorders. Learn how a new treatment may cut down unnecessary operations in "Appendicitis in Children" in The American Weekly, famous magazine with this Sunday's (July 22) issue of The Detroit Sunday Times.

John C. Shaffer, Circuit Judge.

Notice of Hearing on Petition to Vacate and Abandon a Part of Evans Street and Alley in Block 2 of McRae's Addition to Frederick Township, Crawford County, Michigan.

Notice is hereby given that a petition has been filed with the Board of County Road Commissioners of Crawford County, Michigan, for the vacation and absolute abandonment of all that part of Evans Street, commencing at Main Street and continuing East to Cheboygan Street. Also the 20 foot alley commencing at McRae Street and continuing South to Evans Street, as plotted in Block 2 of McRae's Addition to the Village of Frederick.

For the reasons that said part of Evans Street and Alley has never been opened or worked upon, as a public street, that the opening thereof would serve no useful purpose, and would require the expenditure of public money that would not be justified, and as the majority of lots are now owned by the Frederick Consolidated School and are used as a school playground, and that public use of said street and alley would create a hazard for school children using said playground.

Notice is hereby given that a hearing will be held on said petition before this Board on the 8th day of August, 1951, at 10:00 o'clock A. M., at the office in Grayling of said Board of County Road Commissioners.

Dated July 9, 1951.  
Crawford County Board of Road Commissioners,  
William Ferguson, Clerk.
